

THE DAILY CHAIN

every step writes a row

Supervisors capture the first two in the garden, offline. Everything after is automatic.

ONE DAY'S EARNINGS, SPLIT FOUR WAYS

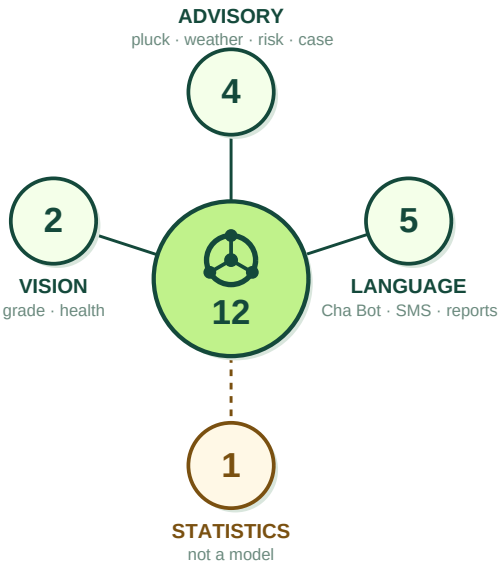

The four always sum to what was earned.

Recorded, never forecast. No cash moves here.

Ribbon widths illustrative — the real split varies by worker.

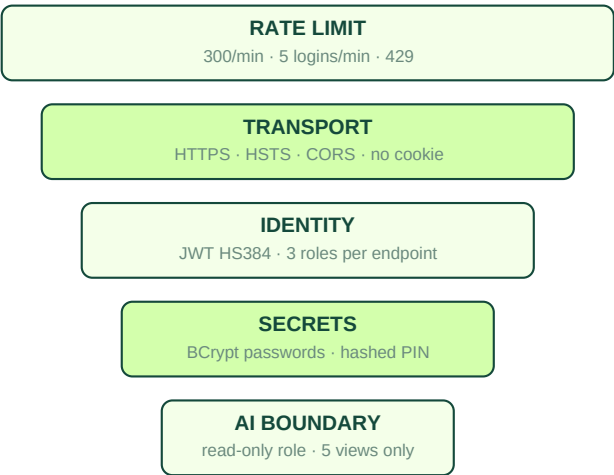

TWELVE AI ENDPOINTS

advise, never decide

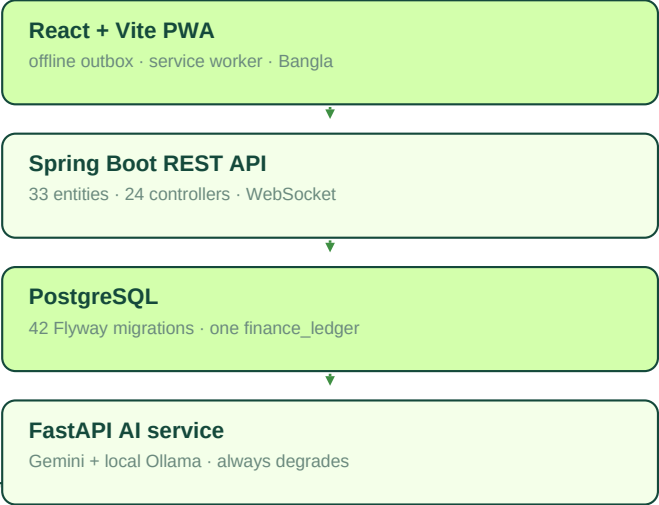

A model never writes a grade, a wage or a status.

DEFENCE IN LAYERS

THE STACK

MEASURED, NOT CLAIMED

Leaf grading: 56.7% on 97 labelled photos vs a 51% baseline ($p = 0.15$) — so the grade is suggested, never pre-filled. Leaf health: never measured, no accuracy claimed.
